Promising match

Your profile aligns with several role needs, with a few areas to strengthen.

Strengths

8 skills assessed

Backend Development (Python / Django / FastAPI / Node.js)

STRONG

1 year of backend development experience at Safertek IT Solutions using Django, Python, SQLAlchemy, and FastAPI for building web applications and automation tools.

RESTful APIs & Microservices

STRONG

Designed CRUD REST APIs using FastAPI, integrated with Bold Reports REST APIs, and tested endpoints using Postman.

Paste responsibilities, requirements, and qualifications...

Check match

Database Design & Query Optimization **STRONG**

Demonstrated expertise in SQL, stored procedures, schema migration (MS SQL Server to MariaDB), query optimization improving performance up to 90%, and working with MongoDB, MySQL, and PostgreSQL.

Frontend Development (HTML, CSS, JavaScript) **HANDS ON**

Listed HTML, CSS, and JS in technical skills and developed web application UIs for OCR and Bus Reservation projects.

Frontend Frameworks (ReactJS) **BASIC**

ReactJS is listed under technical skills, but practical project evidence primarily highlights Python backend development.

Version Control (Git / GitHub) **HANDS ON**

Listed Git and GitHub in technical skills and maintained repositories for multiple web projects.

Cloud Platforms (AWS) **HANDS ON**

Deployed Bus Reservation System on Vercel with MySQL database hosted on AWS RDS.

Docker & CI/CD **BASIC**

Docker and CI/CD listed under candidate technical skills.

Skill gaps

5 gaps identified

TypeScript
REQUIRED SKILL GAP - PRIORITY

Authentication & Authorization (OAuth2, JWT, SSO)
REQUIRED SKILL GAP - PRIORITY

State Management Frameworks (Redux / NgRx / Vuex)

OPTIONAL SKILL GAP

Automated Testing Frameworks (Jest, Cypress, JUnit)

OPTIONAL SKILL GAP

Event-Driven Architecture (Kafka / RabbitMQ)

OPTIONAL SKILL GAP

Recommended next steps

3 recommendations

skills

Acquire proficiency in TypeScript and standard authentication protocols such as JWT and OAuth2 to satisfy key mandatory full-stack requirements.

projects

Build end-to-end full-stack applications with a dedicated React frontend integrated with state management tools (like Redux) to showcase frontend framework depth alongside backend expertise.

skills

Gain hands-on experience with frontend and backend testing tools (e.g., Jest, Cypress, PyTest) to demonstrate comprehensive software quality practices.
